Across Portable series display stand

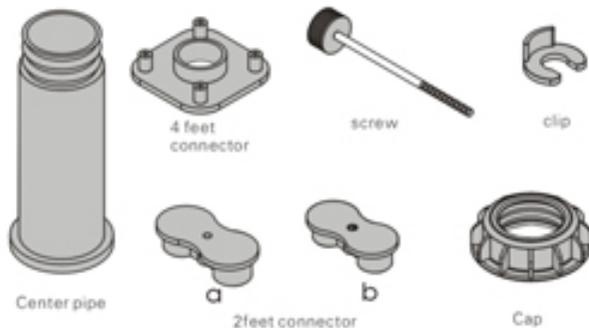

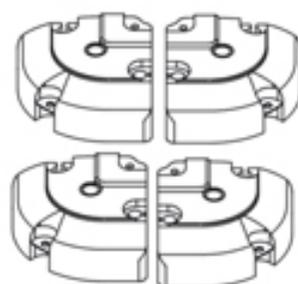

Spare part list

- Flag pole (1pc)
- Hang pole (1pc)

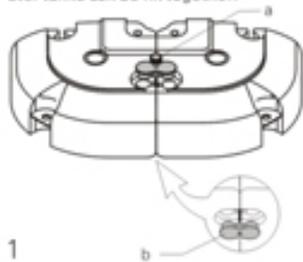

- Water tank (4pcs)

Assemble instruction

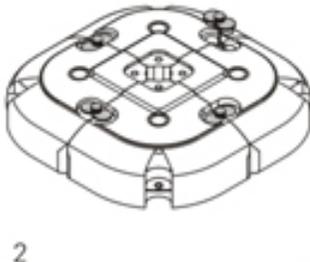

step1

Take two water tanks side by side, put a 2-feet connector in the top slot and another 2-feet connector in the under slot, then use a screw to lock the two 2-feet connectors. so that the two water tanks can be fix together.

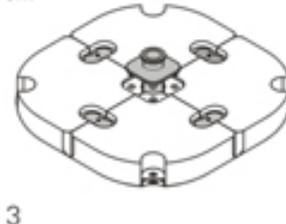

step2

Use the same way like step1 to assemble the rest part, you can see a big water tank come out in seconds.

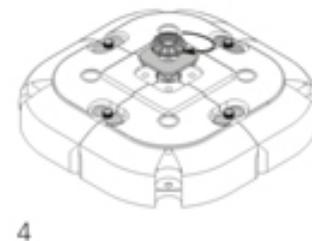

step3

Overturn the water tank, put a 4-feet connector in the center slot, use a center pipe to connect the 4-feet connector and water tank. Please note that the part of the center connector which covered with screw thread must be up from the water tank, as the picture show.

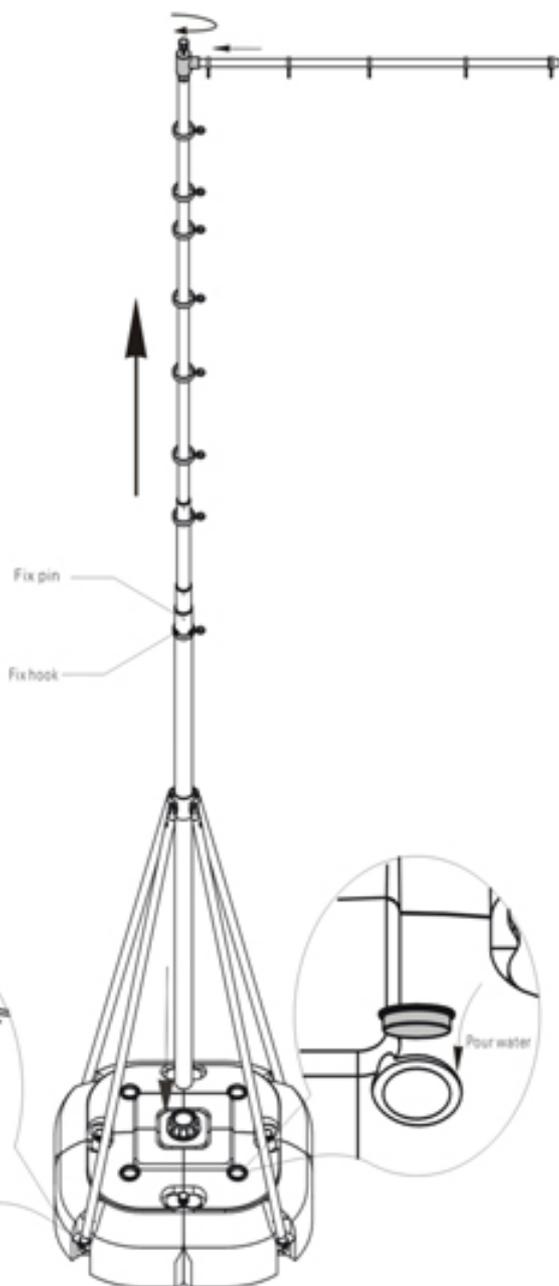

step4

Turn the water tank back, put the 4-feet connector into the top of the water tank, then cover and tight by cap.

step5

Insert the flagpole into the completed watertank as drawing show.put the poster on the flagpole,pull up the telescopic pole until the maxi.

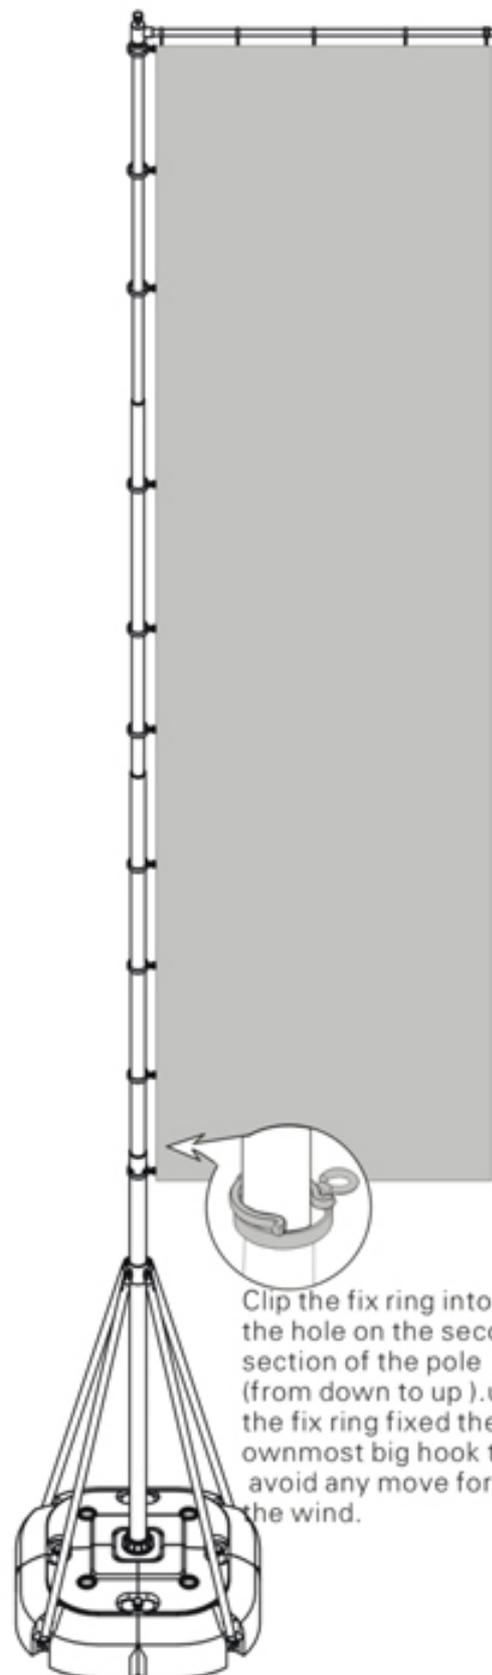

5

! Note:

- 1.when assemble watertank must according to the instruction,otherwish will make difficult to assemble the whole watertank.
- 2.For each part of watertank can fit maxi 18litre water,please pour the water as request.
- 3.If the flagpole use outdoor, please consider the outside wind power in that time. If the wind power over than 7grade,we suggest move the flagpole in order to avoid and accident.

step6

Clip the fix ring into the hole on the second section of the pole (from down to up).use the fix ring fixed the downmost big hook to avoid any move for the wind.
